PROFESSIONAL SUMMARY

Versatile Junior Software Engineer with a professional **Agile** background and a strong focus on building high-performance web applications using **React**. My technical foundation is rooted in **Python**, where I engineered a full-scale RPG using **Object-Oriented Programming** (OOP) principles. With **6+ months of corporate experience** and a portfolio of **14+ end-to-end projects**, I excel at bridging the gap between robust functionality and modern **UI/UX** standards. I am interested in technical **SEO** and performance optimization, ensuring that code is not only clean and maintainable but also search-engine friendly. As a dedicated career switcher, I leverage **AI-driven** development tools (Gemini, Copilot, ChatGPT, Claude) to optimize workflows, eager to bring a collaborative mindset and proven problem-solving capabilities.

SKILLS

- **Languages & Markup:** Python, HTML5, CSS3, JavaScript (ES6+), DOM Manipulation, JSON, SQL
- **Frameworks & Libraries:** React (Hooks, Router), Bootstrap, YooTheme, Numpy, PyGame
- **AI & Data Science:** Prompt Engineering, Pandas, Plotly, Matplotlib, REST APIs, Scikit-learn
- **Tools:** Git & GitHub, Node.js, npm, Joomla, WordPress, FileZilla, VS Code, PyCharm
- **Concepts:** Web Accessibility, Responsive Design, CSS Flexbox & Grid, Media Queries
- **Languages:** Hungarian (native), English (intermediate / upper-intermediate – B2)
- **Methodologies:** Agile (Scrum), SEO Optimization, Technical SEO, Unit Testing
- **Soft Skills:** Problem-solving, Analytical Thinking, Attention to Detail, Team Collaboration

EXPERIENCE

Junior Software Developer | POMS Cloud Ltd.

October 2025 – Present | Remote

- **Frontend Development & CMS:** Delivering high-impact creative assets and responsive web layouts for prominent clients using **VS Code**, **Joomla**, **WordPress** and **YooTheme**.
- **AI Integration:** Utilizing Prompt Engineering and advanced **AI tools** to accelerate development cycles, automate repetitive tasks, and streamline **SEO** optimizations.
- **Full-Stack Contribution:** Assisting in **backend** logic implementation and **database** management to ensure seamless data flow and application stability.
- **Agile Methodology:** Actively participating in a fast-paced **Agile environment**, contributing to daily stand-ups and iterative sprint deliveries.
- **Campaign Delivery:** Deployed high-impact e-commerce **Master Banners** for brands like **Fizz** and **Yettel**, ensuring 100% **brand consistency** and technical accuracy.

KEY PROJECTS

- **AI-Powered Document Assistant (React, Python, Groq, Llama 3)**

Developed a **RAG (Retrieval-Augmented Generation)** application for automated **CV analysis** and data extraction. Integrated **Groq LPU** with **Llama 3** for near-instant inference, and built a **React** frontend supporting PDF processing and real-time streaming responses.

- **Personal Portfolio Website (React, Node.js, Bootstrap):**

Architected a modern Single-Page Application (SPA) using React to showcase professional projects and **8 technical certifications**, optimizing SEO to achieve a **25% increase** in organic Lighthouse scores.

- **FinTech Order & Transaction Management System (FastAPI, SQLite, SQL):**

Developed an asynchronous backend for secure order processing. Implemented strict database-level **ACID transactions** with automatic rollback mechanisms for absolute data consistency, and leveraged advanced **SQL Window Functions** for financial data analytics.

- **Fantasy RPG Game & Landing Page (Python, PyGame, JS, Bootstrap)**

- Developed a custom RPG engine using **PyGame**, featuring AI-driven NPC animations, game states.
- Designed and deployed a dedicated, responsive landing page to showcase game mechanics.

- **Bitcoin Price Prediction (Python, Scikit-learn, Pandas, Plotly)**

Developed a **Machine Learning model** using Polynomial Regression to analyze price trends with **Pandas** and **NumPy** for data preprocessing with interactive visualizations.

- **Dynamic Weather Application (JavaScript, REST API)**

Built a real-time weather dashboard integrating **OpenWeatherMap API** to provide accurate 5-day forecasts for 200,000+ global locations with implemented **dynamic UI rendering**.

- **Movie Info App (Python, REST API)**

Integrated OMDb API to display information for over **300,000+ movies**.

- **Data Analysis & Visualization (Python, Pandas, Plotly)**

Processed and analyzed datasets using **Pandas**, generating interactive visualizations using **Plotly**.

EDUCATION

- **The Complete Web Development Bootcamp – Udemy (2026)**
- **Introduction to Cybersecurity – Cisco Networking Academy (2026)**
- **JavaScript Algorithms & Data Structures – freeCodeCamp (2025)**
- **Complete Front-End Developer Course & Fundamentals – Udemy / Gerilla Mentor (2025)**
- **Advanced Python, Git & 100 Days of Code – Udemy / Gerilla Mentor (2024-2025)**
